

Ferroglobe Environment Global Policy

As one of the world's leading producers of silicon metal, silicon-based and manganese-based specialty alloys, and ferroalloys, we are committed to provide most innovative, efficient and environmentally sustainable solutions to our customers.

Ferroglobe produces the most innovative materials to ensure high quality, safety, technical expertise, and environmental care while improving productivity in all operations.

Aligned with the company's Corporate ESG Strategy, we are committed with the continuous improvement of the environmental performance across our worldwide operations, including the reduction of the environmental impact of our value chain, to contribute to the ecological transition of the economy

SCOPE

This policy applies to all locations and operations where Ferroglobe PLC or its subsidiary companies exercise management control: plants, mines, offices, facilities.

OUR COMMITMENT

Our "Sustainable Production" commitment is based on four strategic pillars:

- *Efficient usage of energy and natural resources*

Continuous research and innovation to develop and implement the best available know-how and technology in electrometallurgical production, ensuring the responsible use of energy and natural resources.

- *Carbon footprint reduction*

Committed to reduce the carbon footprint of our products and processes by promoting innovation, research and development of low fossil carbon technologies and extending our commitment throughout our whole value chain.

- *Circular Economy approach for raw materials and waste management*

Implementing the principles of recycling, re-use and reduction, we minimize the environmental footprint of the production process and enhance the efficient use of natural resources.

- *Ensuring compliance with all the applicable regulations*

Continuously monitoring the environmental performance according to the applicable permits and regulations and integrating the "prevention & control" principles in the environmental management of our operations.

Ferroglobe's environmental strategy is focused to achieve and continuously improve the highest environmental standards worldwide, by sharing and implementing the best environmental management practices and our know-how and technical expertise as key enablers to achieve these objectives.

We strive to strengthen our resiliency and contribution to the sustainable development by integrating the environmental risks and opportunities assesment of our activities and implementing the measures to prevent or mitigate any potential impact.

We encourage our employee's commitment with this Environmental Policy by promoting continuous training and awareness and ensuring implementation of the Company's environmental standards across its worldwide production sites.

It is the responsibility of managers at all levels of the organization to take care that this Policy is communicated, well known and understood by all employees and interested parties.

Environmental leaders are dedicated to support, coordinate and monitor the actions linked to this Policy and related action plans thus enabling Ferroglöbe's ESG Strategy implementation.

As **Ferroglöbe's CEO** and with the support of the Board, I commit to participate actively in the deployment of this Policy, encourage the involvement of all employees in the improvement of the environmental performance and in the consolidation of our sustainability culture.

Marco Levi
